1. The first part of the report is a general description of the project. It includes the title, the purpose of the study, and the scope of the work. The title is "The Effect of Temperature on the Rate of Reaction of Hydrogen Peroxide with Potassium Iodide". The purpose of the study is to determine the effect of temperature on the rate of reaction. The scope of the work is to determine the effect of temperature on the rate of reaction of hydrogen peroxide with potassium iodide.

2. The second part of the report is a description of the experimental procedure. It includes the materials used, the apparatus used, and the method of carrying out the experiment. The materials used are hydrogen peroxide, potassium iodide, and water. The apparatus used is a reaction flask, a thermometer, and a stop watch. The method of carrying out the experiment is to mix a known volume of hydrogen peroxide with a known volume of potassium iodide solution at a known temperature and measure the time taken for the reaction to occur.

3. The third part of the report is a description of the results of the experiment. It includes the data obtained, the calculations made, and the conclusions drawn. The data obtained is as follows:

Temperature (°C)	Time taken for reaction to occur (s)
10	120
20	60
30	30
40	15

The calculations made are as follows:

Temperature (°C)	Rate of reaction (1/time)
10	1/120
20	1/60
30	1/30
40	1/15

The conclusions drawn are as follows: The rate of reaction increases with increasing temperature. The rate of reaction is directly proportional to the temperature. The rate of reaction is inversely proportional to the time taken for the reaction to occur.
